

African IT Center

Networking, Hardware Configuration and IT Solutions

Our services are vast and include hardware configuration and IT solution and it goes beyond that as we specialize also on Lan and Wan design and implementation as well as wireless networking and online communication.

Our engineers are qualified and had gained a state of the art skill to complete and configure any operating system OS platform installation.

Facing any online threats? Well not anymore as in African IT Center we provide a full service from Firewall installation to its configuration that sometimes require heaps of concentration that we have already acquired.

Our expertise also resides on security field we provide installation of CCTV and security systems as well as online security monitoring and building secure access systems and time tracking .[]
